## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Muramatsu et al.

Re claim 1, Muramatsu discloses a method for controlling the drive of an actuator of an active vibration isolation support system that includes an elastic body (16) receiving a load from a vibrating body (18), a liquid chamber (54) having a wall of which at least a part is formed from the elastic body, a movable member (48) that moves out and back to change the capacity of the liquid chamber in a cycle, and an actuator (74) that receives a supply of current to generate an electromagnetic force for moving the movable member out, the method comprising the step of: controlling the current supplied to the actuator such that the current passing through the actuator becomes zero at least when the movable member has moved back. (Column 16, line 65 – Column 17, line 17)

3. Claims 5-7 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Nemoto et al.

The applied reference has a common inventor and assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

***Allowable Subject Matter***

4. Claim 11 is allowed.
5. Claims 2-4, and 8-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

6. Applicant's arguments filed July 2, 2004 have been fully considered but they are not persuasive.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993). Applicant argues that Muramatsu et al. do not teach wherein the operation of the actuator is "unrelated to the position of the movable member within the damping system." However, this limitation is not claimed and is more specific than the current claim language. Applicant claims "controlling the current supplied to the actuator such that the current passing through the actuator becomes zero at least when the movable member has moved back." It is the examiner's position that the current would be zero when the moveable member 48 has "moved back" because it would be in its original position and the actuator 74 would no longer be active. Therefore, the rejection is maintained.

### ***Conclusion***

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
